

LG FARMS - WEIGHT CALIBRATION MARKER

Print at 100% / Actual size. Do NOT use Fit to page or Shrink to fit.

BOARD 1

ArUco DICT_4X4_50, id = 0 | black square edge = 150.0 mm

CHECK BEFORE USE: this bar must measure exactly 100 mm
and the black square exactly 150 mm. If not, reprint at 100%.

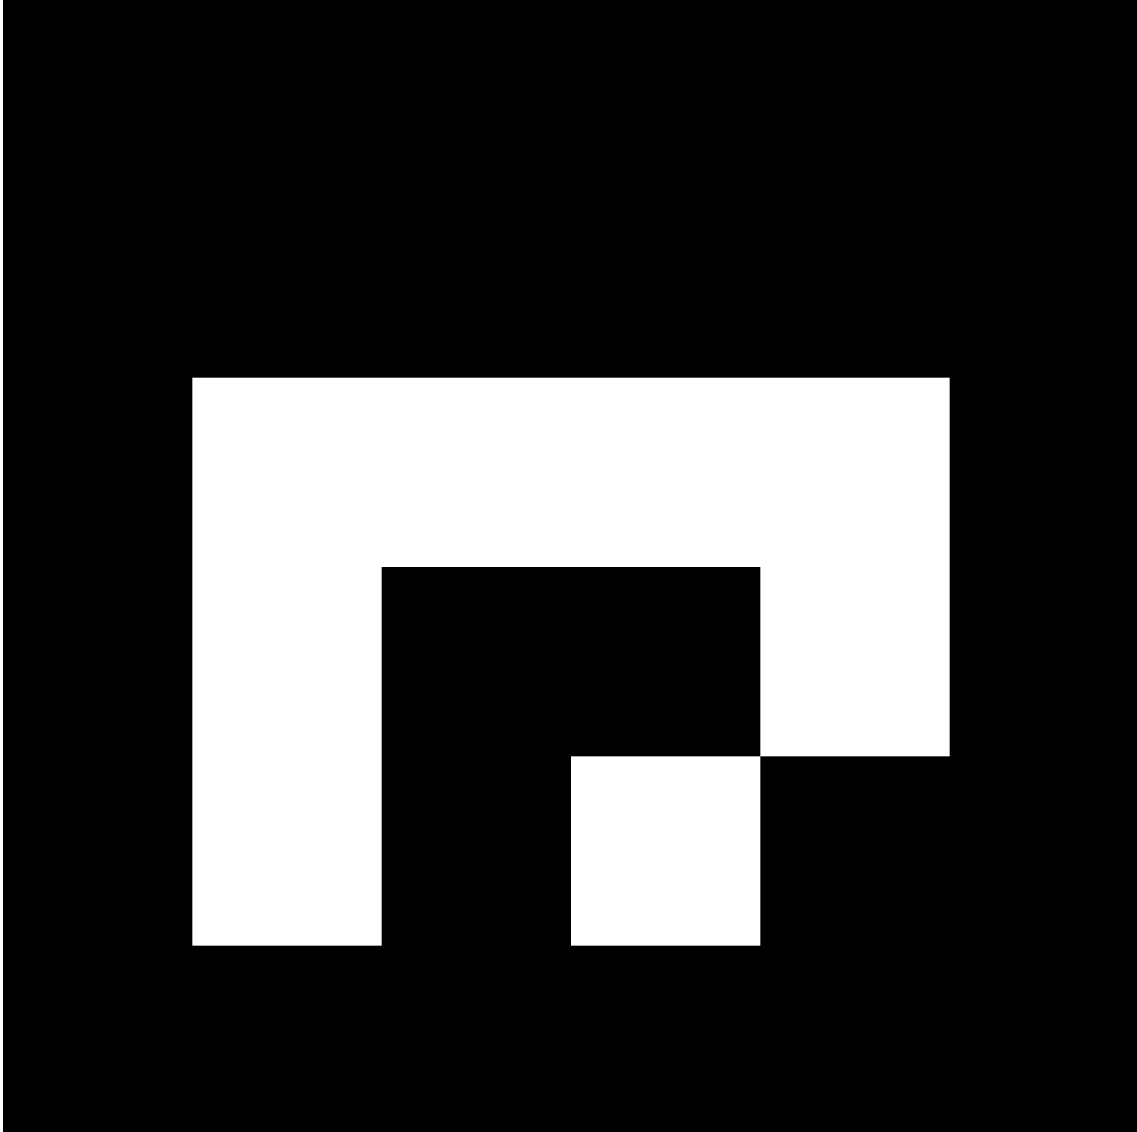

USE

1. Glue this sheet flat to a board or stiff card. No curl, no creases - a bent marker gives a wrong scale.
2. Cover with clear tape or a plastic sleeve. It will get wet and dirty.
3. Lay the board flat on the litter or on the weighing mat. Marker at one END, bird in the middle.
4. Weigh the bird on the scale and WRITE DOWN the reading.
5. Hold the phone directly above, lens parallel to the board, whole marker plus whole bird in frame.
6. One photo per bird. Keep the photo number and the scale reading together in the notebook.

Same board, same marker, every session, whole cycle - day 7 birds matter as much as day 35 birds.
If the marker is replaced, note the date: photos before and after cannot be mixed.

LG FARMS - WEIGHT CALIBRATION MARKER

Print at 100% / Actual size. Do NOT use Fit to page or Shrink to fit.

BOARD 2

ArUco DICT_4X4_50, id = 1 | black square edge = 150.0 mm

CHECK BEFORE USE: this bar must measure exactly 100 mm
and the black square exactly 150 mm. If not, reprint at 100%.
